AUSTRIA. ENVIRONMENTALLY CONSCIOUS

© Austrian Wine / Blickwerk Fotografie

Environmental protection, biodiversity and the responsible use of natural resources have always been important concepts in Austria. Furthermore, strict legal provisions, combined with small, family-run wineries, result in a strong drive to preserve the ecosystem and ensure suitable conditions for future generations.

For the past few decades, Austria's agricultural policy has had a strong environmental focus, including strict regulations and subsidies aimed at erosion control and avoiding the use of herbicides and insecticides. Thanks to organic winegrowing being particularly widespread, together with the "Nachhaltig Austria" (Sustainable Austria) certification, Austria is a global leader in terms of environmentally conscious viticulture.

Nachhaltig Austria (Sustainable Austria)

SUSTAINABLE
AUSTRIA

"Nachhaltig Austria" logo

Founded by the Austrian Winegrowers Association (Weinbauverband Österreich), this label is awarded to sustainable wine producers. Around 360 measures across nine categories (climate, raw materials, energy, soil, biodiversity, water, quality and both social and economic factors) are assessed using a unique, scientifically developed online tool. Producers enter their own data for evaluation. Certification is awarded if the winery meets the (continually rising) targets in the tool and passes an inspection by an external body.

Organic Viticulture

The "EU organic" logo

The "EU organic" label guarantees the quality of products grown in compliance with the guidelines of the EU organic production regulation. Compliance is assessed annually by officially accredited inspection bodies. Organic viticulture centres around the promotion of healthy soil by advocating responsible soil cultivation methods and plant protection products of natural origin, with the aim of strengthening the resistance of the vines. The use of herbicides, synthetic chemical pesticides and genetic engineering is prohibited.

Biodynamic Viticulture

"Demeter" logo

"respekt-BIODYN" logo

Biodynamics is rooted in the work of the Austrian anthroposophist Rudolf Steiner and revolves around the fundamental principle of a self-contained, self-sufficient farming cycle. Two associations in Austria, Demeter and respekt-BIODYN provide members with guidelines on growing wine biodynamically. Organic certification is a prerequisite. Although Demeter operates internationally, Demeter Austria sets additional targets. Founded in Austria, respekt-BIODYN represents members in 4 countries who strive to produce wine of the highest individuality and quality.
